

Sound Campus 2022

Workshop: Wednesday, 7.9.2022 von 12:00 – 15:00

Location: Kunstuniversität Linz Hauptplatz 6 – courtyard (Home of Sound Campus 2022)
Registration by email to Wolfgang.Dorninger@kunstuni-linz.at

Guests: Alwin Weber (Circuit Circle, Dresden), Steffen Koritsch (Noisio, Dresden)

ATtiny Punk Console by Noisio

noisio X Circuit Circle

In this workshop, you can solder an 8-bit synth, various noise toys or effect devices on site. Alwin Weber (Circuit Circle) and Steffen Koritsch (noisio) are developers from Dresden, they organise workshops, soldering festivals and also perform live with their self-developed SoundTools. They bring all the materials, tools and their developments as kits. No previous knowledge is necessary, everything is easy.

The kits cost between €20 and €60.

Alwin Weber (Entwickler, Musiker, Dresden, D)

Alwin has been running Circuit Control - the annual soldering festival in Dresden - since 2011. He started out as Circuit Bender and has been developing his own sound machines for years, which he also uses live.

Screamo: <https://youtu.be/vLrttixyiNg>

Steffen Koritsch (visual artist, musician, developer, Dresden, D)

As a sound artist, he has 12 floppy drives play "Also sprach Zarathustra" by Richard Strauss in technical museums and as an electronics engineer and programmer, he developed the ATtiny Punk Console (short ATPC) and since 2017 the Levitation Oscillator or the ATBase.

What to bring:

- Interest & time
- Tools (soldering iron, solder, pliers, tweezers,), if possible.

Newcomers: Just join in!

Alwin & Steffen regularly organise soldering workshops for kids and adults. They always have projects for beginners. With the sense of achievement, a second or third sound tool is quickly soldered.

The Sound Campus team is looking forward to seeing you!

Screamo: a rather wild, almost dangerous distortion by Alwin Weber.

Levitation Oscillator: 10-Voices drone oscillator /sinus or sawtooth with optional digital ring mode will make you float.
